

Director Level - Cancer Immunotherapy

Job ID: IOM-1014

Who we are

iOmx is a young, dynamic start-up in the field of immuno-oncology located in Martinsried/Munich, Germany. We are focused on innovation-driven research to advance our proprietary early stage novel immune-checkpoint molecules through pre-clinical and clinical development. We are looking for motivated, driven and competent scientists and research assistants who share our vision and wish to contribute in translating this vision into reality.

Your Tasks and Responsibilities

- You would establish and lead a team of scientists and research assistants in order to advance early discovery projects towards pre-clinical drug development
- You would establish cell-based in-vitro, ex-vivo and in-vivo immune-oncology models for evaluating new immune-checkpoint drug candidates (small and large molecules) and enable preclinical studies
- You would be responsible for scientific planning as well as development, evaluation and management of the team and its members
- You would design and execute studies to unravel the mechanisms through which novel immune-checkpoint targets impact on anti-tumor immunity
- You would establish MoA-guided biomarker strategies for pre-clinical assessment
- You would present scientific findings, both internally and externally
- You are expected to coordinate with other research teams (internal and external) to develop and support a sustainable target portfolio within the organization

Who you are

- You hold a PhD in biology/immunology with at least 5 years of postdoctoral experience (preferably in industry setting) in the area of tumor immunology
- You have demonstrated proven expertise in heading preclinical projects including assessment of therapeutic drug candidates (biologics) in functional immunological assays
- You have strong hands-on experience in immune-oncology models (cellular, ex-vivo and in-vivo) and in classical immunological assays, including work with primary human and primate immune cells
- You can inspire, recruit and maintain a team of scientific talents to support the diverse project portfolio within the company
- You should have strong organizational talent with good communication, documentation and interpersonal skills
- Excellent proficiency in spoken and written English is required

Your Application

We offer a competitive salary, benefits package and support both your individual and professional development. Applications for this position should be forwarded to careers@iomx.de by submitting a cover letter indicating the relevant Job ID, your CV and references as well as your salary expectation.
