

Student trainee (Studentische Hilfskraft) (m/f/d)

Job ID: IOM-1037

Who we are

iOmx is a young, dynamic start-up in the field of immuno-oncology located in Martinsried/Munich, Germany. We are focused on innovation-driven research and development to advance our proprietary early-stage novel immune-checkpoint molecules through pre-clinical and clinical development. We are looking for a highly motivated, self-driven and competent student to support our lab operations.

Your Tasks and Responsibilities

You will support our lab teams in part time (ca. 10 h per week) by preparing consumables and independently conducting small experiments such as:

- Preparation of buffers, media and laboratory consumables
- Cleaning and sterilization of laboratory glassware
- Supporting preparations for experiments
- Plasmid preparations (mini and maxi scale)
- Assisting in antibody screening workflows by clone picking, plate replication etc.
- Assisting in high throughput ELISA or FACS assays
- Assisting with phage display work (e.g. phage preparations and phage titer determination)

Who you are

You are a person who is well organized, service-oriented, thorough and diligent in his/her task completion

You are currently enrolled in a study program in the life sciences field (M.Sc.) and you have

- Hands-on experience in molecular biological laboratories through your bachelor/master thesis, external internships or several lab courses
- Good knowledge of English (spoken and written)

Your Application

Applications for this position should be forwarded to careers@iomx.com by submitting a short cover letter indicating the respective job ID and your laboratory experience as well as your CV in English or German.
